

Cedar Newsletter

Spring 1

Hello and welcome back to all of our parents and carers. We hope you have all had a merry Christmas and a happy new year. Here is a breakdown of what the children will be learning this half term.

In English, the children will be budding journalists and learning to write their own newspaper report.

In maths this term, the children will be continuing their knowledge of shapes and learning about symmetry and patterns. They will also be building their knowledge of subtraction.

The children will be going back in time and learning about how the ancient Greeks lived in our history lessons.

In science, the children will be looking at different types of forces and conducting experiments to test the effectiveness of each type.

Our RE topic this term will be Islam and our children will learn more about how Muslims live by their religion.

In music, the children will be researching different video game themes and will be working towards creating their own video game theme tune.

Just a reminder that PE is still on a Tuesday morning so remember to bring in PE kits for this.

We will also use the Forest School area on a Friday whenever the opportunity is available. So please bring in wellies and clothes you don't mind getting muddy.

As always, if you have any questions or concerns then please feel free to get in touch.

Team Cedar: Dave, Emily and Chloe
